DESCRIPTION

Wired Records presents:

The Wired Ones Compilation features 16 new original and never-before-released songs from 14 different artists + 2 videos: one music video and one video clip.

The Wired Ones are bands who are getting established in a wider music scene towards a bigger audience and more money. Making things happen on the next level.

The CD starts off with a **Kevin Blechdom** tune and ends with a Blechdom Live version of "Bad Music". In between you'll find the charming Tiger song from **Heidi Mortenson** which many has been waiting to put on the ipod, **Scream Club's** Vomit Cash remixed, a short hello from rapping **Angie Reed**, queer politics from **Rhythm King ahf.**, a couple of new exciting names e.g. **Chez Debs** and her colorful spandex dancers. **Miss Le Bomb** chases down a vampire, **Dynasty Handbag** turns out a humorous and to the point music video which won second price at the NY Film Festival last year.

This CD is about creating a kind of mix tape with songs that people can relate to and dance to, focusing on a music community that is growing stronger by each month. The Wired Ones is booming with genius creativity touched by urban influences and a lost generation of travel monsters united over the internet. Content is as important as sound. Lyrics are as important as beats.

Wired Records was initiated with Heidi Mortenson's debut album "Wired Stuff" and now continues with a sampler of some of today's most charming and active artists in the European and North American electronic music scene.

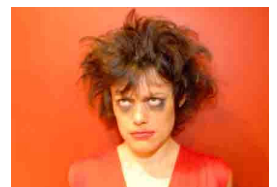

Other artists include: **Reba Hasko**, **Scream Club**, **Ben Adorable**, **Angry Red Planet**, **Monotekktoni**, **Marzipan Marzipan**, **Caro Snatch** and **Sardine Animal**.
