DESCRIPTION:

Wired Records presents:

This is a limited edition 12" with handmade engravings and unique painting on side B of each vinyl. Side A features three songs in Mortenson's charismatic style of experimental pop sound. Wrapped together in a mindblowing labyrinth where every sound has it's place

In "Up From Ocean" slide guitars are singing and electronic waves sweeping in a sailing rhythm that leads you to an island of paradise. Imagine the big grey city gets taken by a flood and next thing you know you wake up stranded on a tropical island. Sex and icecream all day long.

A sleepless night in the city Mortenson finds herself walking home from a night out and starts humming a bass line for a new song. Vocal bass and scratch on "Disco Club" bounces off rolling down the street in it's own sound scenery, playing with the shadows of street lamps in Berlin.

"Stronger Than This" is a musical of mental conversations by various voices featuring the brain the body and the voice to the outside. You're not scitzofrenic you're just distracted. And a computerized air stewardess voice is trying to guide you through an 8bit labyrinth of thoughts.

Camille, WR.
